About Us

At Sprout Energy we deliver affordable and reliable renewable energy and energy efficiency systems to businesses and communities.

Idaho-Based + Nation-Wide Projects

Founded in Idaho, we are straightforward, transparent and committed to ensuring a smooth process through the entire project from initial design, through legal, finance, engineering, permitting, installation, and ongoing operations.

No Upfront Capital + Easy Financing

Our Energy Efficiency-as-a-Service (EEAAS) program provides a 'No Capital Cost' opportunity to engineer LED solutions that improve the overall facility environment, maximize energy efficiency, minimize hazardous waste, and generate a significant economic impact.

Holistic Approach

We look at every solution, weigh the returns and find the best financing. Our consulting solutions have included complete road maps that incorporate energy, waste, water, mechanical, sustainability marketing and hiring sustainability teams.
